TREES, SHRUBS, GROUNDCOVERS, PERENNIALS: Apply as a drench, spring and fall ... mix 9 oz in one gallon of water. **Deciduous Shade Trees:** Apply 1 gallon of solution per dbh (diameter at breast height). Focus the application to an area 2/3 of the way from trunk to branch dripline. **Multistem Trees:** Add stems to approximate dbh. **Evergreen Trees:** Apply 1 gallon of solution per diameter inch (measured 24" up trunk from ground). If tree is branched low to ground, apply around perimeter, close to bottom branches. **Shrubs:** Drench near base, 1 gallon per foot of shrub height. **Ground Covers:** Apply 1 gallon of solution per 2 square feet. **Perennials:** Drench near plant base, 1 quart to 1 gallon. **Newly Planted Trees:** **Drench soil at trunk base out to edge of root mass.**

ANNUAL FLOWERS & GARDEN VEGETABLES: Apply as a drench or using a sprinkling can, every 1 to 4 weeks ... mix 2-4 oz in one gallon of water. **Annual Flowers:** Apply 1 gallon of solution per 4 square feet of planting bed. **Garden Vegetables:** apply near plant base, 1 pint to 1 gallon per plant. **Potted Plants:** Apply as a drench or using a sprinkling can, every 1 to 4 weeks ... mix 2-4 oz in one gallon of water. **Annual Flowers:** Apply 1 gallon of solution per 4 square feet of planting bed. **Garden Vegetables:** Apply near plant base, 1 pint to 1 gallon per plant.

SEED STARTS & FLATS: Apply as a drench or using a sprinkling can, every 1 to 4 weeks ... mix 2-4 oz in one gallon of water. Wet soil thoroughly with fertilizer solution.

FOLIAR SPRAY: Sprayers: Spray foliage to run-off, every 1 to 4 weeks ... mix 2-4 oz in one gallon of water. Minerals & More has been tested for foliar plant damage to sensitive plant species, without injury. There are too many plants to test them all. Self-test on a couple before spraying everything. For hose end sprayers, follow manufacturers instructions.

Follow standard foliar spray protocols. With liquid fertilizers, it is always best to make applications morning or evening, when heat and sun intensity are minimal. If applications are made in less than ideal conditions, mist fertilizer residue off leaves and blooms using clean water.

Store Minerals and More in a dark cool area that will not freeze. Product can be stored for up to one year, but it is advised that product be used up in the season it is purchased.

Keep out of the reach of children. Harmful if swallowed. After use, always wash hands and exposed skin with soap and water.
